PE inflow in realty dips 44% to \$3bn so far this yr: Report

Says Geopolitical Uncertainty, High Interest Rates Hit Flow

New Delhi: Global investors have been cautious this year to put money into Indian real estate, as private equity inflow is down 44% till December 12 to \$3 billion compared to the entire previous year, according to Knight Frank.

Real estate consultant Knight Frank India on Thursday released its data showing that the Indian real estate market received \$3,024 million in PE investments from 23 deals between January 1 and December 12 this year, as against \$5,357 million recorded in 2022.

Global geopolitical uncertainties and a high interest rate environment with multiple rate hikes from the US Federal Reserve and the Central Bank of Canada have curbed investment activities from US and Canada, the consultant said, explaining the reason behind the slump.

However, PE investments from Singapore have improved significantly, contributing more than 50% to the total inflow.

In terms of segments of the Indian real estate market, office assets took the lead with a 58% share in the total PE investments, followed by warehousing at 23%, and residential properties at 19%.

The retail sector did not witness any PE deals in 2023.

Across the segments, Mumbai received the largest proportion of such investments at \$1,685 million (1.6 billion), followed by the National Capital Region at \$835 million, and Bengaluru at \$347 million.

Mumbai attracts maximum investment at \$1.6 billion

India-Oman FTA to help boost apparel exports: AEPC

New Delhi: A free trade agreement with Oman will help boost apparel exports as huge business opportunities are there in the Gulf nation for Indian exporters, AEPC said on Thursday.

Negotiations for the pact, officially dubbed as the Comprehensive Economic Partnership Agreement (CEPA), are moving at a fast pace. The Apparel Export Promotion Council (AEPCC) said that the swift movement towards CEPA is encouraging and will be a game changer for India-Oman bilateral trade.

The bilateral trade between the two countries stood at \$12.4 billion in 2022-23, up from \$10 billion in previous year. "RMG (readymade garments) exports to Oman grew from \$13 million in 2020 to \$28 million in 2021. Customs duty in Oman is 5% on RMG products. Though it is a small market but has immense potential to grow once tariff is eliminated post-FTA and will be another doorway to GCC countries," AEPCC secretary general Mihleshwar Thakur said.

Gulf Cooperation Council is a union of six countries in Gulf region — Saudi Arabia, UAE, Qatar, Kuwait, Oman and Bahrain. The council is the largest trading bloc of India. He also said to increase exports, India is organising BHARAT TEX EXPO 2024 here from February 26-29. A roadshow to attract domestic industry was organised by AEPCC on December 15 in Bengaluru. Naren Goenka, chairman AEPCC, has given assurance to brand representatives and sourcing teams about sustainability status of Indian manufacturers across all environmental, social, and governance parameters.

Trair to look at spectrum pricing for satcom cos

New Delhi: With satellite-based communication companies set to get spectrum administratively instead of through auctions, after the move was recommended in the Telecommunications Bill 2023, the government is now planning to ask regulator Trair to work out pricing and other modalities before allotting the airwaves.

While the move gets formalised after the Bill receives a green signal from Parliament, it is being seen with a lot of hope and excitement by companies looking to begin satellite communications in India. These include not only OneWeb, which is backed by Sunil Mittal's Bharti group, but also others, such as, Elon Musk's Starlink, American Viasat, and Jeff Bezos' Project Kuiper.

While Starlink has approached the department of telecom (DoT) for getting the global mobile personal communication by satellite (GMPCS) services licence, OneWeb and Mukesh Ambani's Jio (in partnership with Luxembourg-based SES) have already got the approval.

There is a process and procedure that Trair adopts when recommending pricing for spectrum where it is allotted administratively. While the broader terrestrial spectrum is auctioned by DoT, on reserve pricing recommendations from Trair, airwaves are also given out administratively for many services — towards national security and defence, inflight and maritime connectivity, needs of central and state governments, and for roads, railways, metro, regional rail, inland waterways, airports, ports, pipelines, shipping, and other transport systems.

The government has decided to opt for administrative allocation in satellite communications as technically the spectrum for this purpose is a common resource and no exclusivity can be provided. This has been the practice across most of the markets where satellite-based telephony is provided.

Market analysts said satellite communications will likely be a niche area, with expected market share at only about 1% of the connectivity business, even when the handful of companies begin operations.

K Guru Gowrappan, Global President of Viasat Inc, said the company welcomes the Telecommunications Bill's proposal to assign spectrum administratively. "Satellite spectrum auctions are impractical and come with a high cost. Satellite systems do not use spectrum exclusively but rather share it globally through coordination."

Lt. Gen. AK Bhatt (Retd.), DG of Indian Space Association (ISPA), called it a "progressive and forward-looking decision" and said the decision to allocate satellite spectrum through a globally-harmonised administrative method will help spur growth in the nascent space sector. "By allocating the spectrum administratively, India can align itself with international standards, promote global cooperation and also help drive innovation, create opportunities for startups, and strengthen the country's position in the global satellite market."

NICHE PLAY

- Companies such as Sunil Mittal's OneWeb, Elon Musk's Starlink, American Viasat, and Jeff Bezos' Project Kuiper are looking to start satellite communications in India
- Satellite communications will likely be a niche area, with expected market share at only about 1% of the connectivity business, say analysts

Apartment sales in top 7 cities may rise 20% this year: Report

New Delhi: Sales of apartments across seven major cities are estimated to rise by 20% to around 2.6 lakh units, the highest since 2008, on better demand, according to JLL India.

Sales stood at 2,15,621 units in the last calendar year in Delhi-NCR, Mumbai, Chennai, Kolkata, Hyderabad, Bengaluru and Pune.

Real estate consultant JLL India on Thursday said sales in the first nine months of 2023 reached 1,96,227 units as against 1,61,575 units in the year-ago period.

Only apartments were covered in the report while row houses, villas, and plotted developments are excluded. Mumbai includes Mumbai city, Mumbai suburbs, Thane and Navi Mumbai.

In 2024, the consultant expects residential sales to be around 2,90,000 to 3,00,000 units on the back of robust demand and quality launches.

"Despite the increase in home loan interest rates and rising prices, the overall sentiment in the domestic housing market remains positive, with homebuyers maintaining an upbeat attitude towards purchasing homes.

"In 2023, residential sales are expected to surpass 2,60,000 units and launches 2,80,000 units to reach a historic high post-2008," Samantak Das, chief economist and head of research, India at JLL, said.

Commenting on the report, Akhil Saraf, founder of HDPC Capital-backed Reloy, said the real estate industry has undergone a comprehensive transformation in recent years, encompassing regulatory changes and a shift in the mindset of both suppliers and consumers.

Reloy helps builders in generating referral sales.

"Developers are increasingly adopting a customer-centric approach, focusing on meeting the specific needs and demands of homebuyers. This renewed focus has bolstered confidence among potential buyers, reaffirming real estate as a viable asset class," Saraf added.

Pradeep Aggarwal, chairman of realty firm Signature Global, said the real estate sector has witnessed an impressive surge this year across major cities, including Delhi-NCR.

Sensex recovers on buying in heavyweights

Mumbai: Benchmark equity indices—sensex and Nifty—recovered by more than 0.5% on Thursday following buying in index majors HDFC Bank and Reliance Industries.

The 30-share BSE sensex jumped 359 points or 0.5% to settle at 70,865 with 21 of its stocks ending in the green and nine in the red.

The barometer opened lower and fell further by 586 points or 0.8% to a low of 69,920. But, markets found the winning momentum in the afternoon session and climbed 452 points or 0.6% to 70,959.

The broader Nifty rallied 105 points or 0.5% to 21,255 as 38 of its constituents advanced and 12 declined. During the day, it hit a high of 21,288 and a low of 20,977. Both key indices had hit record high levels in intra-day trade on Wednesday before closing sharply down.
