IndianOil

EPCM SERVICES

Trusted Partner in Growth

Fast-Track Delivery of Energy Infrastructure from Concept to Commissioning

Delivering integrated Engineering, Procurement and Construction Management **(EPCM)** solutions backed by decades of experience in developing and operating India's critical energy infrastructure.

Why IndianOil?

- 10 Group Refineries. 80.75 MMTPA Capacity. Unmatched Scale.
- India's largest cross-country pipeline network with over 20,000 km of pipelines.
- Proven expertise in execution of complex hydrocarbon, gas and infrastructure projects across diverse geographies.
- End-to-end project delivery capability from feasibility studies to commissioning and handover.
- Strong project governance, HSE management, quality assurance and stakeholder coordination.

Our EPCM Service Spectrum

Engineering

- Feasibility Studies & BDEP
- FEED & Detailed Engineering
- Process, Mechanical, Civil, Structural, Electrical & Instrumentation Design
- HAZOP / HAZID Studies
- 3D Modelling & Design Optimization

Procurement

- Procurement Planning
- Vendor Qualification
- Tendering & Contract Management
- Inspection
- Logistics Coordination

Construction Management

- Site Supervision
- Project Controls
- QA/QC Management
- HSE Management
- Contractor Coordination

Commissioning & Startup

- Pre-commissioning
- Cold & Hot Commissioning
- Performance Testing
- Operator Training
- Asset Handover

Sectors Served

- Cross-Country Pipelines
- LNG Infrastructure
- Tank Farms & Storage Terminals
- Refineries & Petrochemical Facilities
- City Gas Distribution Networks
- CBG & Green Energy Projects
- Electrical Substations
- Solar Power Projects
- Smart Terminals & Depot Infrastructure

ENGINEERING SOLUTIONS. DELIVERING ENERGY. POWERING TOMORROW.

Proven Execution Excellence

EPCM Track Record

IndianOil has successfully delivered EPCM, PMC and engineering assignments for leading organizations including CPCL, GIGL, IHB, KSPPL, HMEL, NOC (Nepal), Indian Navy and other clients.

Key EPCM Highlights

Energy Infrastructure

- Process Engineering Projects for Refineries
- LNG Hubs and Regasification Facilities
- Tank Farms and Storage Systems
- CGD Networks
- Electrical Substations and Smart Terminals

Major Pipeline Infrastructure

- Kandla-Gorakhpur LPG Pipeline
- Kochi-Salem LPG Pipeline
- North East Gas Grid Feasibility Studies
- Pipeline Projects for GIGL, GSPL and CPCL

Cross-Border Projects

- Motihari-Amlekhganj Pipeline, Nepal
- Amlekhganj-Chitwan Pipeline, Nepal
- Siliguri-Jhapa Pipeline, Nepal

Our Core Strengths

Proven In-House Expertise

More than six decades of engineering, project execution and operational excellence in the hydrocarbon sector.

Safety-First Culture

Integrated HSE systems, safety audits, toolbox talks and proactive risk management across project lifecycle.

Technology & Innovation

3D Modelling, SCADA-GIS Integration, HDD Crossings, Smart Pigging and Digital Integrity Systems.

End-to-End Support

From concept development and design to commissioning, startup and operational support.

Partner with IndianOil EPCM

Reliable. Efficient. Cost-Effective.

IndianOil EPCM Services combines engineering excellence, project execution capability and operational expertise to deliver future-ready energy infrastructure across hydrocarbons, gas, LNG, petrochemicals, renewables and sustainable energy sectors.
